PROFESSIONAL SUMMARY

IT professional with 4+ years of experience supporting enterprise applications, managing IT infrastructure, implementing information systems, and developing web and mobile solutions. Experienced in HRIS and Hospital Management Information Systems (SIMRS), technical support, network administration, database operations, QA testing, and user training. Hands-on exposure to MikroTik, Cisco, PostgreSQL, MySQL, Docker, Linux-based web infrastructure, and application development. Focused on reliable IT operations, structured troubleshooting, and practical system improvement.

CORE TECHNICAL COMPETENCIES

IT Operations & Support: Hardware/software troubleshooting, end-user support, server maintenance, backup and recovery
Networking & Security: MikroTik, Cisco, LAN/WAN, VLAN, IP addressing, router/AP configuration, firewall, SSL, fiber-optic splicing
Systems & Infrastructure: Windows Server, Alibaba Cloud, AWS, Active Directory, NAS, Docker, Nginx, Caddy, deployment environment support.
Database Administration: PostgreSQL, MySQL, MongoDB, Redis, SQL joins, indexing, query optimization, backup and rollback
Application & Development: JavaScript, Java, Php, Vue.js, Node.js, Python, Flask, Flutter, web/mobile application development, API integration
Implementation & Quality: SIMRS/HRIS implementation, QA testing, business-process review, SOP documentation, user training
Monitoring & Tools: Prometheus, Grafana, Kafka, Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

IT Support & Web Developer | PT. Ambil Gaji Duluan

Jakarta Pusat, Indonesia | Jan 2026 – Present

- Provide operational support and troubleshooting for HRIS and Earned Wage Access (EWA) applications.
- Develop and integrate Vue.js dashboard components to support HRIS workflows.
- Configure application deployment environments using Docker and Caddy web server.
- Support database reliability and performance through SQL query optimization, indexing, backup, and rollback activities.
- Investigate application, server, and user-reported issues and coordinate technical resolutions.

Technical Support – CCTV Project (Project-Based) | PT. Sinergi Teknologi Internusa

Jakarta Barat, Indonesia | Sep 2025 – Dec 2025

- Conducted proof-of-concept (POC) activities at client sites, including CCTV installation and technical validation.
- Provided technical support during and after POC implementation.
- Configured camera AI features and device settings based on client requirements.
- Configured and supported network segments dedicated to CCTV deployment.

IT Implementation Specialist | PT. Daya Medika Pratama

Jakarta Pusat, Indonesia | Oct 2024 – Aug 2025

- Implemented, tested, and documented Hospital Management Information Systems (SIMRS).
- Provided onsite technical support and application assistance during system implementation and operation.
- Prepared user guides and standard operating procedures (SOPs) to support consistent system usage.
- Delivered user guidance and training for hospital operational staff.

IT Support & QA Tester Specialist | PT. Dinamika Digital Semesta

Tangerang, Indonesia | Feb 2023 – Sep 2024

- Supported IT infrastructure, CCTV, network devices, hardware, and software across operational environments.
- Implemented, tested, and documented Hospital Management Information Systems (SIMRS)
- Managed PostgreSQL database tasks, including SQL joins, query optimization, indexing, and backup activities.
- Performed QA testing for SIMRS, reviewed business workflows, documented findings, and supported system improvements.
- Configured network equipment, IP addressing, access points, firewall rules, and SSL certificates.
- Performed network cabling and infrastructure troubleshooting, including RJ45 termination and fiber-optic splicing.
- Configured Docker application containers and monitored network/server conditions.

IT Staff & System Administrator | Rumah Sakit Juwita

Bekasi, Indonesia | Jan 2021 – Jan 2023

- Maintained internal hospital systems and Network Attached Storage (NAS) infrastructure.
- Implemented, tested, and documented Hospital Management Information Systems (SIMRS)
- Supported server security, IP access monitoring, and preventive measures against malware.

- Maintained and troubleshot servers, desktop PCs, laptops, and printers.
- Managed automated storage backups and provided day-to-day technical support to hospital users.
- Configured IP addressing, routers, access points, and network cabling based on operational requirements.

SELECTED PROJECTS

My Religi Mobile Application: Developed a digital Qur'an mobile application with tafsir and bookmarking features.

Kelontong Shop / Digital POS: Worked on a grocery-store e-commerce/POS application project.

E-Commerce Customer Support Chatbot: Developed a web-based chatbot concept for customer enquiries, with integration to WhatsApp Admin.

EDUCATION & CERTIFICATION

S1 | Universitas Terbuka | Sistem Informasi | 2022-2026

SMK PGRI 1 Depok | Software Engineering (Rekayasa Perangkat Lunak) | 2016 – 2019

Software Engineer Competency Certification | PT. Sintekindo

LANGUAGES

Indonesian (Native) | English (Technical Working Proficiency)
